Walking vowels   X65087_en

Dessign the function *vocales_andarinas*(*w*) which, given a str *w* in lowercase, rewrites it rotating by one the vowels.
That is,
where there is an `a` put `e`
where there is an `e` put `i`
...
where there is an `u` put `a`

Sample session

```
>>> vocales_andarinas("patata")
'petete'
>>> vocales_andarinas("aeiou")
'eioua'
>>> vocales_andarinas("mi mama me mima")
'mo meme mi mome'
```
